## PUBLICATIONS

[Point of Desire im Lebensmittelhandel, 2016, epubli](#)

Qualitative Research and Business Plan in the field of Online Grocery Retailing.

## HIGHLIGHTS

- Does software development since being a child (8 years, C64 basic)
- Started own company at the age of 19
- Wrote several successful business plans
- Participated in the development of the first Middle European massive multiplayer online game as sole frontend developer
- Won Austrian State Award with sysis ag aged 21
- Wrote NoSQL, Graph-based database (big data) in 2002 and developed graphical user interfaces to visualize complex data
- Hosted online video streaming platform in 2003
- Wrote custom libraries in the field of ORM, Widget Frameworks (e.g. JavaScript, ActionScript)
- Was part of the bwin live betting team (eli v2), helped creating an award winning, high volume betting site and implemented the continuous integration process (live betting unit, lot of configurations management) and TDD practices
- Supported the development of a real-time online game for children called at.lant.is in 2010
- Worked for Jumio (Eduardo Saverin, A16Z known for facebook) start-up in Linz as consultant
- Planned, engineered and marketed several software products as well as open source software
- Drafted a fully functional prototype for a customized stamp printing software for the Austrian State Printing House as entrepreneur
- Did various, generic implementations for casino games (like slot machines)
- Returned to university to academically certify knowledge and gained industry standard certifications
- Introduced and formed an agile organization from scratch at mozaiq operations GmbH (a joint venture from ABB, Bosch, Cisco) in the role of scrum master
- Migrated dozens of software projects from SVN to GIT while introducing a microservice based design instead of monolithic code (Deutsche Bank).
- Looking for new adventures!
